

## PROFESSIONAL EXPERIENCES

**Kabir Builders, Swarn Bhumi** – Project & Data Strategy Associate (June'25- Present) Umaria, India  
*Family-owned commercial and residential real estate development firm delivering modern infrastructure in underpenetrated cities.*

- Developed IRR/NPV models to optimize pricing and unit-positioning strategies, and Phase 2 unit mix, shifting 4BHK:5BHK ratio from 3:2 to 5:1 based on sales data and customer feedback, projected to improve absorption and returns to 18–22% IRR.
- Negotiated and closed a 7-year lease with MediZone Hospital (Jabalpur) to bring a multi-specialty facility with ER services to Umaria, addressing a critical gap in emergency healthcare access.
- Assembled a 5-member marketing team to expand digital outreach, contributing to ~30% increase in inbound inquiries.
- Redesigned the project's GTM strategy into an integrated digital-offline model, leveraging outdoor media and local creator partnerships (20K+ audience) to drive awareness and inbound demand for a first-of-its-kind residential project in the city.
- Owned end-to-end operations and contractor management across 60+ residential units and 5+ vendor teams, coordinating civil, electrical, and plumbing workstreams while tracking material usage, on-site progress, and phase-wise timelines for Phase 1.
- Led migration of 100% of active project accounts from manual and offline systems to a cloud-based ERP, standardizing real-time tracking of sales, expenses, and party-wise balances, improving reporting efficiency by 60%.
- Established financial control and reporting cadence by reviewing weekly expense logs and presenting projected vs. actual budgets across 8+ cost categories, improving execution discipline and enabling more accurate, data-driven Phase 2 planning.
- Executed cost optimization initiatives across procurement and operations, including shifting plantation sourcing from out-of-state vendors to local nurseries, negotiating bulk rates, and reducing logistics overhead, delivering ~15% cost savings.
- Supported revenue generation and on-ground sales execution by conducting 80+ on-site walkthroughs for inbound residential buyers and assisting in closing early-stage demand through direct customer engagement.
- Drove organization-wide system adoption by personally training 50+ site and office employees, embedding standardized digital workflows that improved technology adherence by 40% and increased user adoption by 50%.

**MP Birla Group Marketing Data Analyst Intern** (June'24 - Aug'24) Jabalpur, India

- Developed and validated a sales forecasting model using 2 years of district-level sales data across 5 regional branches and ~20 districts (~1.3M+ units), analyzing demand trends to guide marketing prioritization, inventory planning, and production alignment.
- Translated forecasts into marketing strategy by identifying high-growth and high-volatility districts through actual vs. projected sales analysis, informing targeted promotions, pricing schemes, and budget allocation across priority markets.

## EDUCATION

**The Pennsylvania State University, University Park, PA, USA** Aug 2021 – May 2025

B.S. Information Sciences & Technology, Applied Data Sciences (Dual Major), GPA- 3.38/4.0

B.S. Mathematics, System Analysis (Dual Major), Dean's List- 4/8

- **Research:** Implemented ML on a 100k-record healthcare dataset to develop a diabetes risk prediction algorithm with 97% accuracy.
- **Personal Finance Platform:** Designed a full-stack '*Personal Finance Platform*' enabling proactive spend control via category-wise budget alerts, triggered at 90% thresholds, helping users prevent overspending before limits are exceeded.
- **Video Game Recommendation System:** Engineered a system using ALS on a 41M+ interaction dataset, leveraging the Penn State Roar supercomputer for distributed processing, improving runtime by ~40% and recommendation accuracy by ~12% (RMSE).
- **Stock Market Visualization Dashboard:** Built an interactive dashboard for visual comparison of AMZN and MSFT stock trends, translating raw data into intuitive, user-driven charts for non-technical users using HTML, CSS, JavaScript, and Chart.js.

## ADDITIONAL INFORMATION

- **Skills:** Data Analysis & Modeling: Python, SQL, R, Regression Analysis, Machine Learning | Business Intelligence & Visualization: Power BI, Microsoft Excel, Data Visualization | Product & Systems Development: JavaScript, Node.js, Express.js, MongoDB
- **Association of Women in Computing (AWC) Member:** Participated in 5+ technical and career-development events, including women-in-tech talks, workshops with PwC and EY professionals, and Girls Who Code, focused on career readiness.
- **Nittany Data Labs Member:** Participated in 10+ sessions and attended a Penn State alumni networking event in Washington, DC.
- **Learning Assistant, Department of Mathematics:** Supported 40+ students per section in Calculus II through in-class worksheet facilitation (3×/week), led weekly 2-hour problem-solving sessions for ~15 students, and held 2 hours/week of virtual office hours, resulting in stronger conceptual clarity, improved problem-solving, and exam preparedness in a high-difficulty quantitative course.
- **Residential Dining Employee:** Oversaw 5 students/shift in order execution, cross-trained in 8+ station recipes.
- **Swachhta Hi Seva Campaign Volunteer:** Contributed to 4+ government-led cleanliness drives, supporting on-ground coordination with X+ volunteers for waste segregation, plastic reduction awareness, and public spaces restoration under municipal supervision.
- **COVID-19 Community Response Volunteer:** Led on-ground coordination for distribution of food and essential supplies to 50+ households, guiding 10+ volunteers and liaising with district administration to prioritize elderly and vulnerable beneficiaries.
